Passage -I

No one knows exactly where or when cricket began, but it is most likely that it began as a children's game in England, and was played only by children for many countries. It is believed that the game was invented by children who belonged to the farming families of south-east England. They would play in grass clearing or areas grazed by sheep. A matted lump of sheep's wool, or even a stone or lump of wood, would be used as ball, a stick or some other farm tool would serve as the bat, and a gate or tree stump would be used for the Wicket. The earliest written reference to the game was in 1598, where it was called 'Creeckett'. In the 17th century, it slowly became a village game and adults began to take part in it. Today cricket is one of the most popular sports of the world and is played and watched by millions.

Answer the following questions.

1. Where is Cricket believed to have started?
2. Who were the earlier players of Cricket?
3. In which year was the earliest written reference to cricket made?
4. What was the game called at that time?
5. When did cricket become a game played by adults?

Passage- II

Ever since she burst into the scene by making it to the 1980 Moscow Olympics as a 16- year old, P.T. Usha's tall deeds have exemplified Indian sporting excellence. The spirit queen was so consistent for well over a decade that she was truly the flag bearer who helped countrymen live the dream of rare sporting excellence in the international arena.

Hailing from a remote village called Payyoli, Usha became an icon for sport lovers. She made the nation swell with pride, every time she stepped on to the track. She gave unalloyed joy to her fans when she became the first Indian woman to make an Olympic final.

Usha's greatest moment was also the most shattering in her life as she was pushed to the fourth place in the 400 metres hurdles final at the 1984 Los Angeles Olympics. The Romanian Christina Cojocaru won the bronze medal. Usha lost by an agonizing $1/100^{\text{th}}$ of a second. But every Indian household acknowledge the sense of achievement, though it fell short of India's first Olympic medal from the track. Several girls born during the 1980s were named after the golden girl. It serves as an eloquent testimony to the love and affection many people had for Usha.

Usha's reign as the Asian sprint queen was highlighted by her snapping up five gold medals and a bronze at the 1985 Jakarta Asian track and field meet followed by a sensational four gold medals and one silver haul at the Seoul Asian Games the following year.

Well, champions are forever and Usha will always be the yardstick by which any woman athlete will be measured in this country.

1 Answer the following:

1. When did Usha capture the imagination of the entire nation?
2. How did she help her country men live the dream of rare sporting excellence?

3. Why were many girls in the mid-80s named after Usha?
4. What was the most shattering moment in the life of Usha?
5. Write the main events that happened in Usha's life in the following years.
